Art Unit: 2817

DETAILED ACTION

Allowable Subject Matter

Claims 1 – 10 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 6:

Ramesh (Fig. 2) shows an electromagnetic interference protection circuit comprising a ferrite bead connected in series to a power source (12) and further comprising a parallel capacitor (20) but does not show the circuit connected to a clock buffer where the circuit of Ramesh is connected only to the clock (14) thus also does not provide EMI protection to a clock buffer.

Taito et al. (Fig. 4) shows a generic electromagnetic interference protection circuit (19) and a clock buffer (16) receiving clock signals but like Ramesh above does not provide EMI protection to the clock buffer where the noise filter is connected at the output of the clock buffer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kroll et al. shows a defibirillator with slew rate limiting.

Application/Control Number: 10/605,033

Art Unit: 2817

Vince – shows EMC filtering comprising a ferrite bead and parallel capacitor.
